Technical Assessment

Overview

This document outlines the scope and requirements of a technical assessment that consists of 1 part only

Part One

Scope

Create a small web-based NFT Marketplace that consists of 2 pages

→ **Homepage**: The main landing page with the following sections

- ◆ [Hero](#) with a slider: Image + Text
- ◆ [Explore NFTs](#): A grid of 3 NFTs per row
- ◆ [Footer](#): Displaying the sitemap and some contact information

→ **NFT Page**: The detail page of an NFT once clicked from the Explore page listed above

Goal

Check applicant ability to deliver something given basic requirements.

Requirements

- Write it using ReactJS
- Inspire the main layout and branding from the screenshots shared in this document (No need to be very detailed)
- Use json files to load the data. E.g. Slider, NFTs, ...

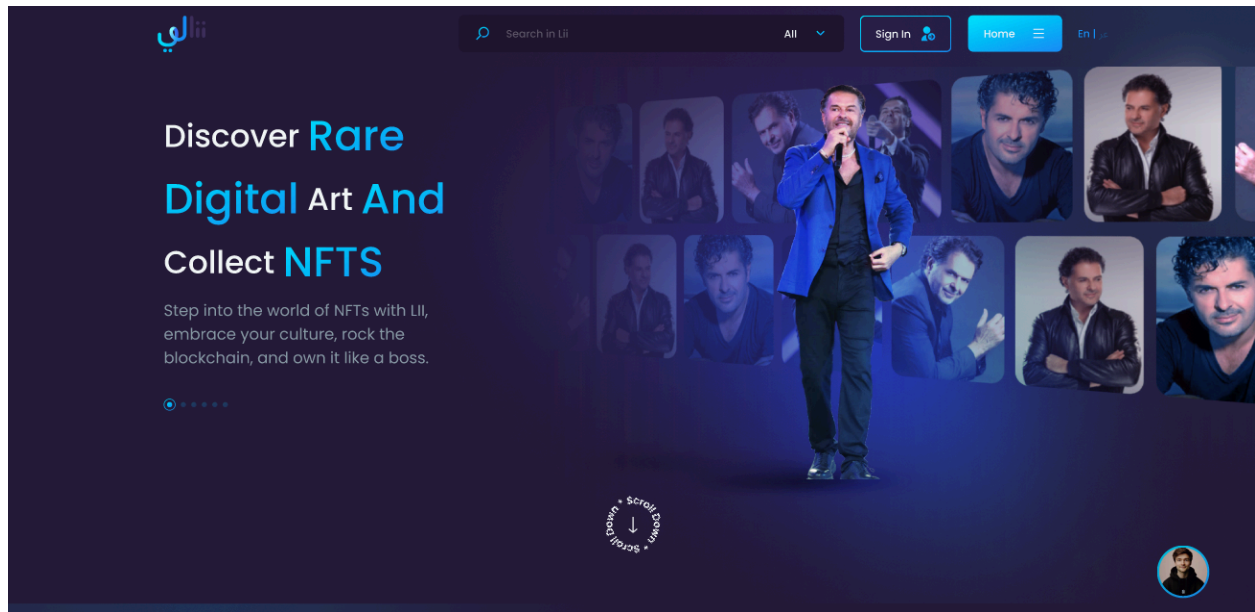

Deliverables

Project pushed to github, containing all the needed files to replicate the environment needed.

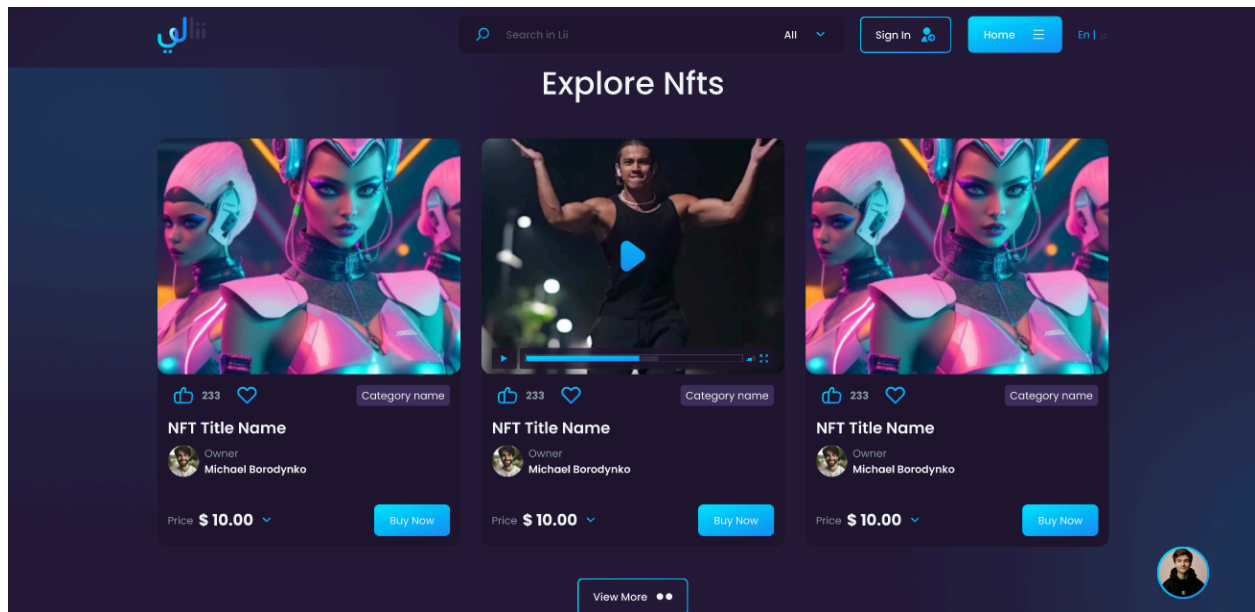

Good luck!
